

GRIP-LOK® APPLICATION GUIDE

3303MCS-TA for Arrow PICC Line Securement

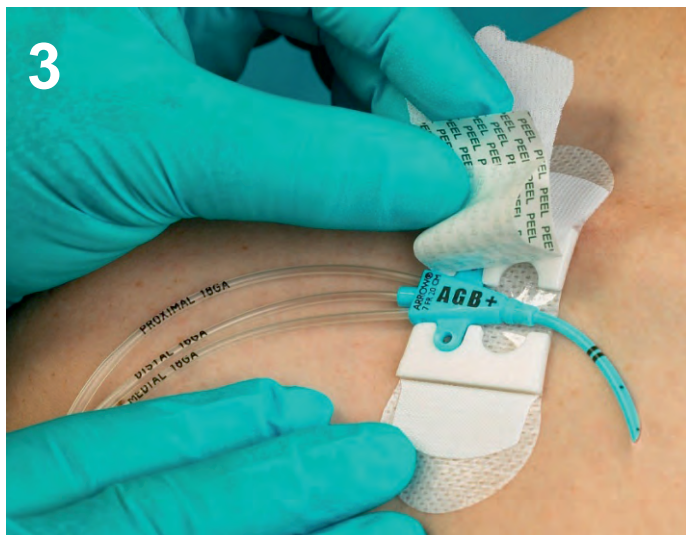

Prepare the skin according to the standard hospital protocol for dressing application. Skin prep or hair removal may be required on some patients for better adhesion.

Open the top flap and slide the Grip-Lok® under the catheter hub. Position the catheter hub down into the foam cut-out and press gently to the adhesive.

Pull and remove one side of the bottom release liner while holding the Grip-Lok® in position. Then pull and remove the other side of the bottom release liner.

Pull and remove the inner release liner under the top flap to expose the adhesive.

Secure the top strap over the catheter hub and press the adhesive in place. The top strap can be peeled back to inspect and adjust the catheter hub.
